## Assignment & Release

\* I understand & agree that health & accident insurance policies are an agreement between an insurance carrier & myself. Furthermore, I understand that this office will prepare any necessary reports & forms to assist me in making collection from the carrier & that any amount authorized to be paid directly to this doctor's office will be credited to my account upon receipt.  
 \* As a courtesy to you, we will verify your health care benefits for this office. You will then be responsible for any co-pays and deductibles.  
 \* Your health insurance is a contract between you & the insurance carrier. In the "rare" event that your insurance company is in "bad faith" & after our office has made every attempt to have all claims paid, we will have you, the patient, be responsible for contacting your insurance carrier to have the claims paid.  
 \* If your insurance company has not paid within 120 days of billing, you will be responsible to pay the balance due.  
 \* If Collection efforts become necessary to enforce payment terms, the patient agrees to pay all collection costs, attorney's fees, & other costs associated with collecting this balance.  
 \* I hereby authorize & release the doctor & his /her assistants, to administer treatment, physical examination, x-rays studies, chiropractic care, physical therapy, or any clinic services that he/she deems necessary in my case; I furthermore authorize him/her to disclose all or any part of my patient record to any person or corporation which is or may be liable under a contract to this office or to the patient or a family member or employer of the patient for all or part of the clinic's charge, including & not limited to hospital or medical services companies, worker's compensation carriers, welfare funds, or the patient's employer.

**INFORMED CONSENT FOR CHIROPRACTIC TREATMENT**

I hereby request and consent to the performance of chiropractic treatments (also known as chiropractic adjustments or chiropractic manipulative treatments) and any other associated procedures, physical examinations, tests, physiotherapy, physical medicine, physical therapy, medical treatment, injections, use of prescription medications, interpretation of labs, etc. on me by the doctor of chiropractic, doctor of medicine, physician’s assistant, nurse practitioner, and/or other assistants and/or licensed practitioner employed by All Star Health LLC.

I am aware that in the performance of any procedure that there may be risks, including but not limited to infection, worsening of pain, the ineffectiveness of the procedure, bleeding into the joint, headache, nerve damage, increase in blood pressure or blood glucose, lung puncture, skin reaction or color changes, fractures, disc injuries, dislocations, muscle strain, Horner’s syndrome, diaphragmatic paralysis, cervical myelopathy and costovertebral strains and separations, blood loss as well as reaction to medications. Some types of manipulation of the neck have been associated with injuries to the arteries in the neck leading to or contributing to complications including stroke. I understand the above and have had the opportunity to ask questions. I may inquire of my provider for additional information, and I may require additional treatment for possible complications.

I affirm that the nature, purpose, risks, complications, and consequences of the above interventional procedure have been explained to me by the provider(s). I have been given the opportunity to ask all of my questions. They have been answered to my satisfaction. I hereby give my consent.

I affirm that I am aware that the practice of chiropractic and medicine is not an exact science and I acknowledge that I have not been given a guarantee or assurance as to any outcome/results that may be obtained.

I consent to the administration of such anesthetics as may be considered necessary or advisable by the physician responsible for the foregoing procedure(s).

In the event I should require emergency/hospital intervention, 911 will be called and I will be transferred to the nearest receiving hospital.

If a staff person is exposed to my blood or bodily fluid, I consent to my blood being drawn and tested for HIV and Hepatitis. The results will go to me, my medical record, to the exposed worker, to the Employee Health Services Dept. and/or Infection Control here, and to the State Officials.

In consideration of our agreement and as part of entering into this contract, which we both agree is a valid and sufficient consideration for entering this Agreement, that claims controversies, disputes, or tort action arising out of or relating in any manner to the treatment or delivery of services by us to you, shall be submitted to binding arbitration, which shall be conducted according to the American Arbitration Association Guidelines. We both understand that by agreeing to arbitration we are both waiving our right to a jury trial. This Agreement also binds all parties whose claims may arise out of or relate to treatment or delivery of services by us to you, including claims by your spouse or heirs or children. The only time we can go to court and use the judicial process is for debt collection and such claims that are not subject to binding arbitration. Examples of these kinds of claims would be injunctive relief, guardianship proceedings, and declaratory relief. If there is a doubt, the arbitrator will decide whether or not it is not covered by this Agreement.

I certify that I have read and fully understand all paragraphs. All my questions have been answered.

INFORMED CONSENT FOR TRIGGER POINT/JOINT INJECTIONS

Name: \_\_\_\_\_ DOB: \_\_\_\_\_

Trigger Point Injections (TPI) are used to treat painful and tender areas of muscle. Normal muscle contracts and relaxes when it is active. A Trigger Point is a discrete knot or taught band of muscle that forms when muscles fail to relax. The knot often can be felt under the skin and may twitch involuntarily when touched (jump sign). A small needle is inserted into the trigger point and a local anesthetic (e.g. Lidocaine, Bupivacaine, Marcaine) and/or anti-inflammatory/steroid is injected. Insertion of the needle inactivates the Trigger point and thus alleviates pain. Joint Injections are given to treat inflammatory conditions, such as rheumatoid arthritis, gout, and occasionally osteoarthritis. Corticosteroids are frequently used for this procedure as they are anti-inflammatory agents that slow down the accumulation of cells responsible for producing inflammation within the joint space. Commonly injected joints include the hip, knee, ankle, shoulder, elbow, and small joints of the hand and feet. Additional treatment may be needed to achieve sustained relief. The details of the procedure have been explained to me in terms I understand.

Alternative methods and their benefits and disadvantages have been explained to me.

Before undergoing one of these procedures, understanding the associated risks is essential. No procedure is risk-free. Along with the needed effects of the procedure, I understand and accept that there are risks for possible adverse reactions or complications that can occur with any procedure. I understand and accept that there are complications, including the risk for death or serious disability that exist with any surgical procedure. The following risks and complications are well recognized, but there also may be risks not included in this list:

- Infection
  - Trauma to nerves or vascular structures
  - Allergic reactions to the medications
  - Soft tissue swelling, bruising, or hematoma formation
  - De-pigmentation (a whitening of the skin)
  - Rupture of a tendon located in the path of injection
  - Numbness
- Needle breakage
  - Vasovagal reaction (fainting)
  - Joint damage
  - Local fat atrophy (thinning of the skin) at the injection site
  - Pain may be associated with the procedure and healing process

I understand and accept the anticipated outcomes of the procedure to include but are not limited to:

- Increased circulation to the muscles
  - Increased pain threshold at the trigger point
  - Pain reduction
  - Decrease in Inflammation
  - Increased exercise tolerance
- Increased range of passive and active motion
  - Multiple sessions may be necessary
  - Temporary injection and post-injection site tenderness and/or pain

I have informed the physician/nurse practitioner (provider) of all my known allergies. I have informed the provider of all medications I am currently taking, including prescription drugs, over-the-counter remedies, herbal therapies and supplements, aspirin, NSAIDs, and any other recreational drug or alcohol use. I have been advised whether I should avoid taking any or all of these medications on the days surrounding the procedure. I have been informed of what to expect in the post-injection period, including but not limited to: estimated recovery time, anticipated activity levels, and the possibility of additional procedures. The provider has answered all of my questions regarding this procedure.

I certify that I have read and understand this treatment agreement and that all the blanks were completed prior to my signature.

I authorize and direct Michael T. Kelley, M.S., PA-C/Tim Lane, PA-C, with associates or assistants of his choice to perform the procedure of trigger point injections. I further authorize the physician/nurse practitioner and assistant(s) to do any other procedure that in their judgment may be necessary or advisable should any unforeseen circumstances arise during the procedure.

Patient signature: \_\_\_\_\_ Date: \_\_\_\_\_

As the provider, I certify that I have explained the nature, purpose, benefits, risks, complications, and alternatives to the proposed procedure to the patient or the patient’s legal representative. I have answered all questions fully, and I believe that the patient/legal representative fully understands what I have explained.
